

Get Organized Even On Windows

Thursday, 24 December 2009 15:27

Here's a cool (and free) application that can make your life a bit more organized if you tend to have many open windows.

For me, it's very convenient to organize my desktop when VNC is not supported, so I can have one desktop with my Outlook & Explorer, another desktop with all the Linux stuff, and a third desktop with a bunch of open PDF manuals.
